<b>Office Action Summary</b>	Application No. 10/813,173	Applicant(s) NATI ET AL.	
	Examiner Mark Hellner	Art Unit 3663	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Claim Rejections - 35 USC § 103*

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 40-57 and 74 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gu et al.

Gu et al (figure 7c) disclose a high power fiber amplifier system comprising: a master oscillator (Seed Laser) operable to generate a plurality of uniform laser pulses (schematically shown); a down counter that receives the plurality of uniform laser pulses and outputs selected ones of the pulses, the other pulses being attenuated (see schematic); and a power amplifier (Fiber Laser Amplifier) operable to receive the selected pulses from the down counter to amplify the selected pulses.

The difference between the subject matter of claims 50-57 and Gu et al is the use of a pulse selector and pulse attenuator for the function of the down counter (703).

Paragraph (0158) of Gu et al teaches that a high speed optical switch be used for the down counter and, as such, suggests a pulse selector and pulse attenuator because they are inherent elements of an optical high speed switch.

Claims 40-49 and 74 are rejected for the reasons applied to claims 50-57.

Applicant's arguments filed 03/12/2007 have been fully considered but they are not persuasive. Gu et al (2005/0092720) is a continuation of application number

Art Unit: 3663

10/683,086 which has a filing date of October 10, 2003. As a result, the effective US filing date of Gu et al is October 10, 2003.

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
